PROFESSIONAL PROJECTS

Hogarth Worldwide - WOW Magazine

Sep 2022 - Demo site [🔗](#)

Group project developing a web page for a female oriented magazine. The site has a completely dynamic design and all sections can be laid out according to editorial needs. Development and UX/UI design of an interactive widget, connecting the user's chosen emotion with recommended articles to increase site traffic.

Applied technologies:

- Backend: **STRAPI** and **MongoDB**
- Frontend: **Next.js** and **Chakra UI**
- **Agile methodologies** and **GitHub**.

La vaca chocha (*The Happy Cow*)

Aug 2022 - Demo site [🔗](#)

Two weeks **group project** developing an **e-commerce** for a fictional natural & organic products shop. Full CRUD for users, products, and categories. It has search functionality and filters, plus both normal and admin user profile options.

Applied technologies:

- Backend: **PostgreSQL** and **Express.js**. **Bcrypt**, **JWT**, and **Sequelize**.
- Frontend: **React**, **Redux**, and **Material UI**
- **Agile methodologies** and **GitHub**.

Movie House

Aug 2022 - Demo site [🔗](#)

One week **individual project**, developing a movie site using the TMDB API. It has login functionality for both normal and admin users, management of favorite movies and tv-shows, search functionality, and filters.

Applied technologies:

- Backend: **PostgreSQL** and **Express.js**. **Bcrypt**, **JWT**, and **Sequelize**.
- Frontend: **React**, **Redux** and **Material UI**
